

Capability Statement

Marine Operations, Environmental Monitoring & Field Logistics

Eden / Twofold Bay, NSW

OVERVIEW

Eden Marine Field Services (EMFS) is an independent marine and environmental field services provider supporting coastal monitoring, environmental surveys, marine operations and field logistics.

We provide practical field support for researchers, consultants, government agencies, aquaculture operators and coastal industries requiring safe, reliable and flexible marine capability.

Based in the Eden / Twofold Bay region, EMFS supports projects across the Far South Coast and south-east Australia.

CORE SERVICES

- Small vessel support operations
- Site access and marine field logistics
- Scientific and commercial diving support
- Underwater inspections and ecological surveys
- Coastal and nearshore monitoring assistance
- Water quality sampling and chain of custody
- Event-response environmental observations
- Field campaign and contractor support

EXPERIENCE & QUALIFICATIONS

Founder Paul McCann has more than 15 years' experience working across marine science, environmental monitoring, vessel operations, and diving projects throughout Australia and overseas.
